Experiment 2

Setting Up a Zoho Creator Account and Exploring the Platform Architecture and Interface

Aim

To create a Zoho Creator account and explore the platform architecture, features, and user interface for developing the Transport Management System, which includes vehicle, driver, passenger, route, and trip management.

Theory

Zoho Creator is a cloud-based low-code application development platform used to build customized business applications. It provides various components such as Applications, Forms, Reports, Pages, Workflows, Deluge Scripting, and User Permissions.

Procedure

1. Open a web browser and navigate to the Zoho Creator website.
2. Create a Zoho account or sign in using existing credentials.
3. Access the Zoho Creator dashboard.
4. Create a new application named Transport Management System.
5. Explore the Application Builder interface and its available components.
6. Examine the Form Designer and create forms such as Vehicle Details, Driver Details, Passenger Details, Route Details, and Trip Scheduling.
7. Explore the Report Builder to view and manage the records created through the forms.
8. Navigate through the Workflow section to understand automation features for vehicle status updates and insurance expiry alerts.
9. Explore Pages, Dashboard, Settings, User Management, and Application Permissions.
10. Observe the overall platform architecture and understand how forms, reports, workflows, and dashboards work together in the Transport Management System.

Output Screenshots

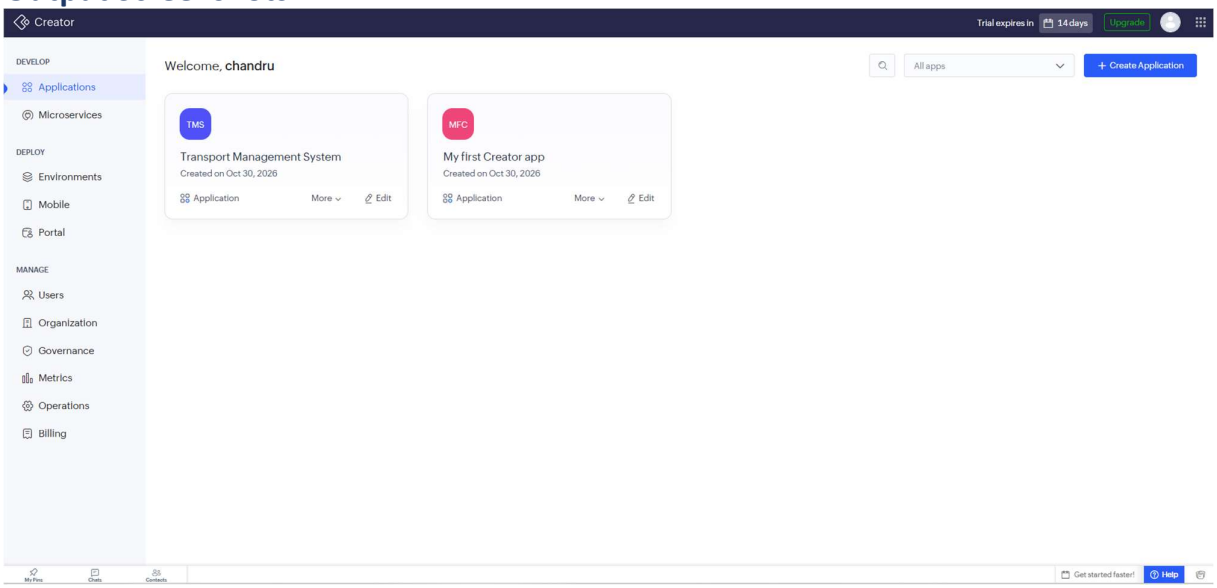

Figure 1: Zoho Creator home dashboard displaying the Transport Management System applicati

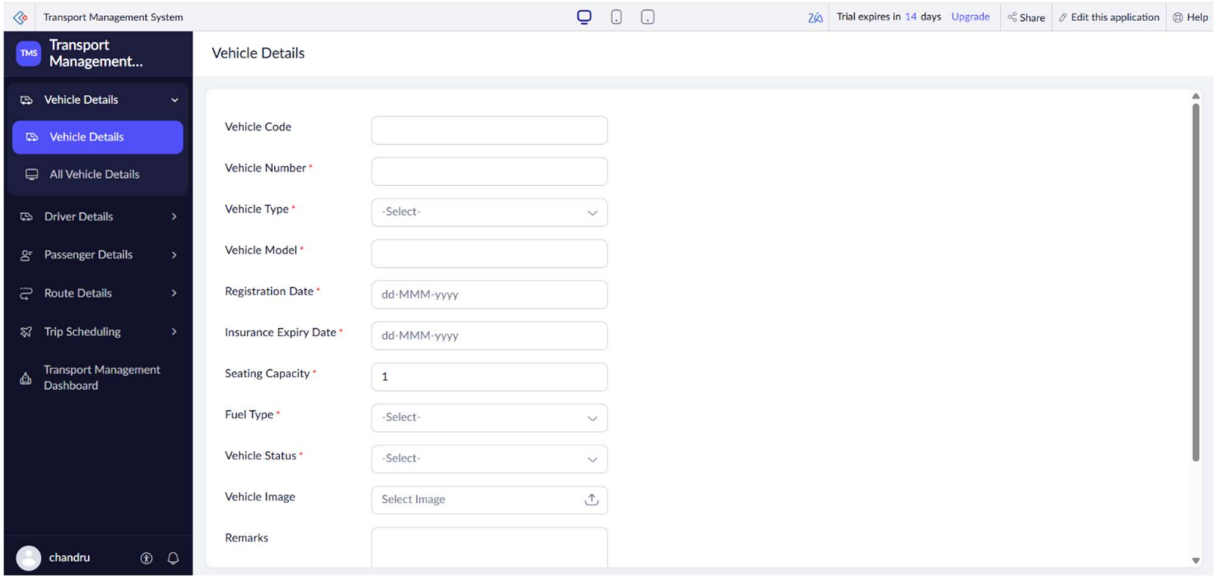

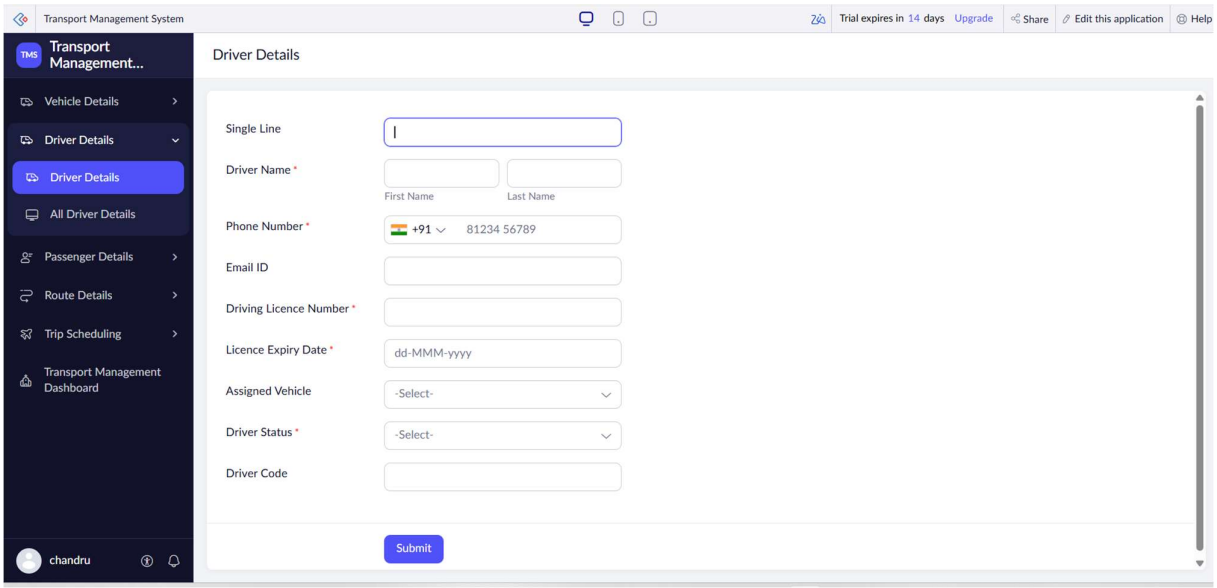

Figure 2: Vehicle Details Form showing vehicle registration and insurance information fields.

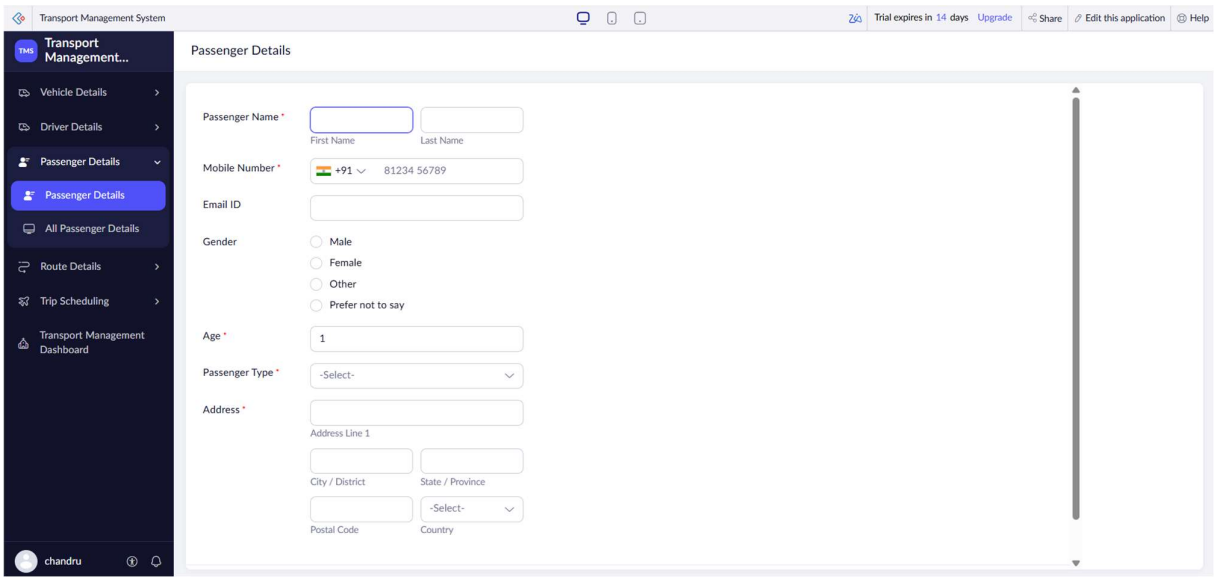

Figure 3: Driver Details Form showing driver personal information and licence details.

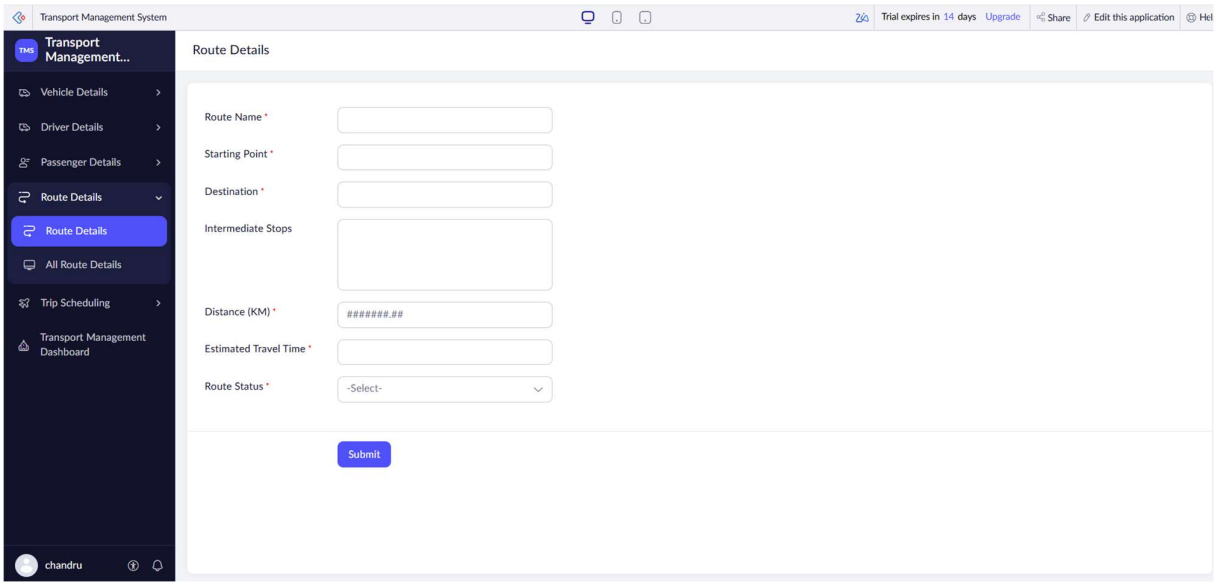

Figure 4: Passenger Details and Route Details Forms showing passenger registration and route information.

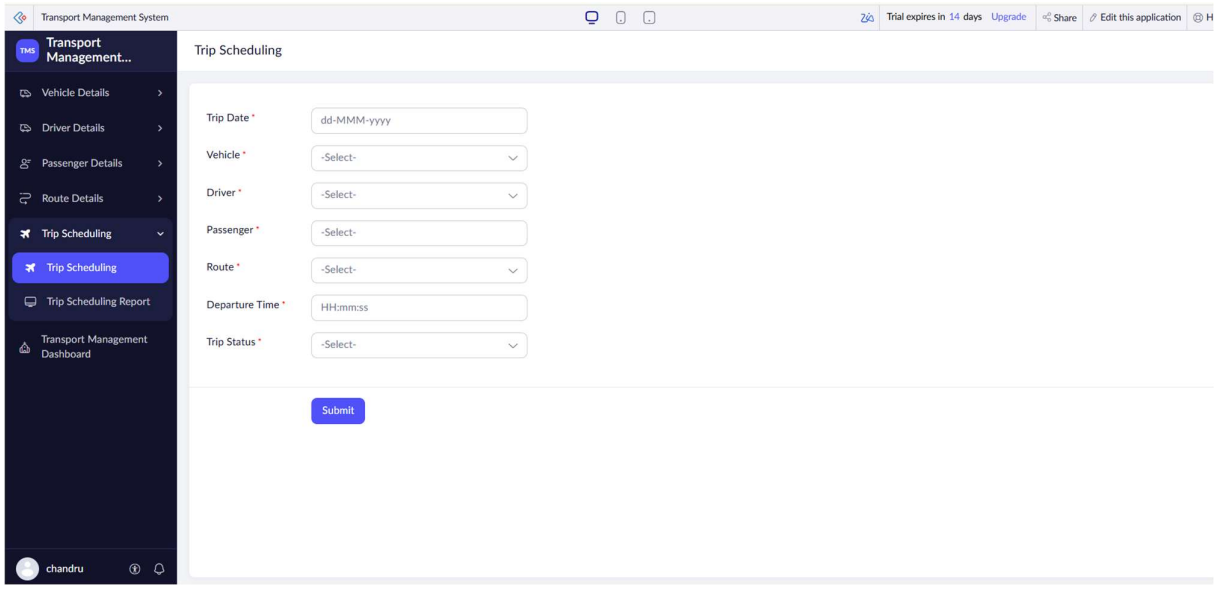

Figure 5: Trip Scheduling Form showing vehicle, driver, passenger, route, departure time, and trip status fields.

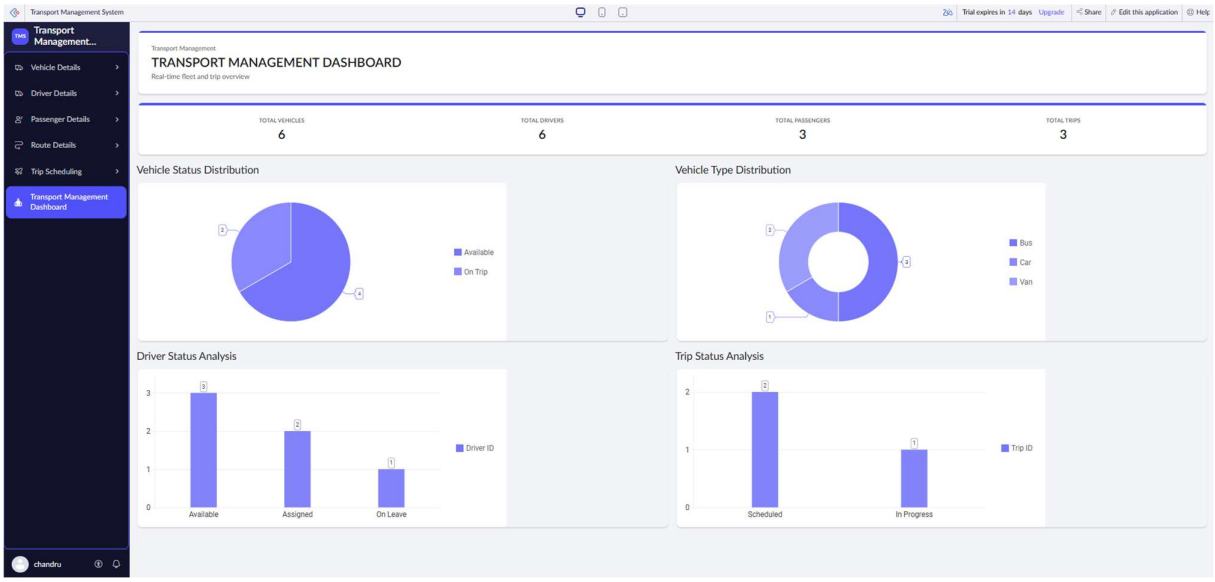

Figure 6: Transport Management Dashboard displaying KPI cards and visualizations for transport operations.

Result

A Zoho Creator account was successfully created, and the platform architecture and user interface were explored. The experiment demonstrated that Zoho Creator provides an intuitive low-code environment with tools such as forms, reports, workflows, pages, and dashboards, enabling rapid application development with minimal programming effort.
