Experiment 4-A

Vehicle Details Form Using Basic Fields

Aim

To design and build a Vehicle Details Form in Zoho Creator using basic form fields to collect and maintain vehicle information, including registration details, vehicle classification, insurance expiry, seating capacity, and vehicle status for the Transport Management System.

Procedure

1. Open the Transport Management System application in Zoho Creator.Owner fills in personal, contact, vehicle, issue, and scheduling details across the four sections.
2. Navigate to the Forms section and create a new form named Vehicle_Details_Form.
3. Add the required fields to collect vehicle registration, classification, insurance, and other related information.
4. Organize the fields into suitable sections such as Vehicle Information, Registration Details, and Vehicle Status.
5. Configure mandatory fields and validation rules for vehicle registration number, seating capacity, and expiry dates.
6. Configure the Vehicle Status field with options such as Available, On Trip, and Under Maintenance.
7. Save and publish the form to enable vehicle record entry.
8. Enter sample vehicle details and submit the form.
9. Open the Vehicle Details Report to view, search, and manage the registered vehicle records.
10. Verify the form fields and validation rules to ensure accurate vehicle information is maintained.

Fields Used

Field Type	Field Name	Purpose
Single Line	Vehicle_Number	Stores the vehicle registration number.
Single Line	Vehicle_Code	Unique identification code for the vehicle.
Drop Down	Vehicle_Type	Selects vehicle category such as Bus, Car, or Van.
Single Line	Vehicle_Model	Stores the vehicle model name.
Date	Registration_Date	Records the vehicle registration date.
Date	Insurance_Expiry_Date	Tracks the insurance expiry date.
Number	Seating_Capacity	Stores the maximum passenger capacity.
Drop Down	Fuel_Type	Selects Petrol, Diesel, Electric, or CNG.
Drop Down	Vehicle_Status	Indicates Available, On Trip, or Under Maintenance.
Image	Vehicle_Image	Uploads the vehicle photograph.
Multi Line	Remarks	Stores additional vehicle information.

Form Layout

- **Section A, Vehicle Information:** Vehicle Number, Vehicle Code, Vehicle Type, Vehicle Model.
- **Section B, Registration Details**: Registration Date, Insurance Expiry Date, Seating Capacity, Fuel Type.
- **Section C, Vehicle Status:** Vehicle Status, Vehicle Image, Remarks.

Validation Rules

- Vehicle Number, Vehicle Type, Vehicle Model, Registration Date, and Seating Capacity are mandatory.
- Vehicle Number should be entered in a valid registration format.
- Seating Capacity must contain a positive numeric value.
- Insurance Expiry Date must be entered correctly.
- Vehicle Status must be selected from the available options.
- Vehicle Code should be unique for each vehicle.

Output Screenshots

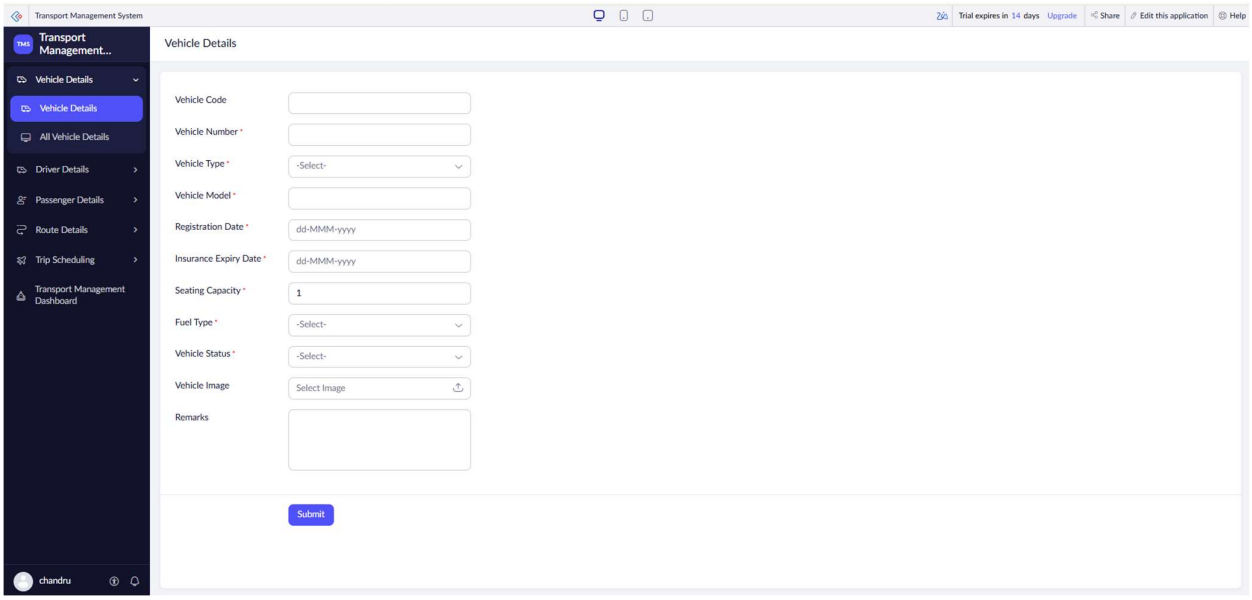

Figure 2: Live Vehicle Details Form displaying vehicle information, insurance expiry, seating capacity, and fuel type.

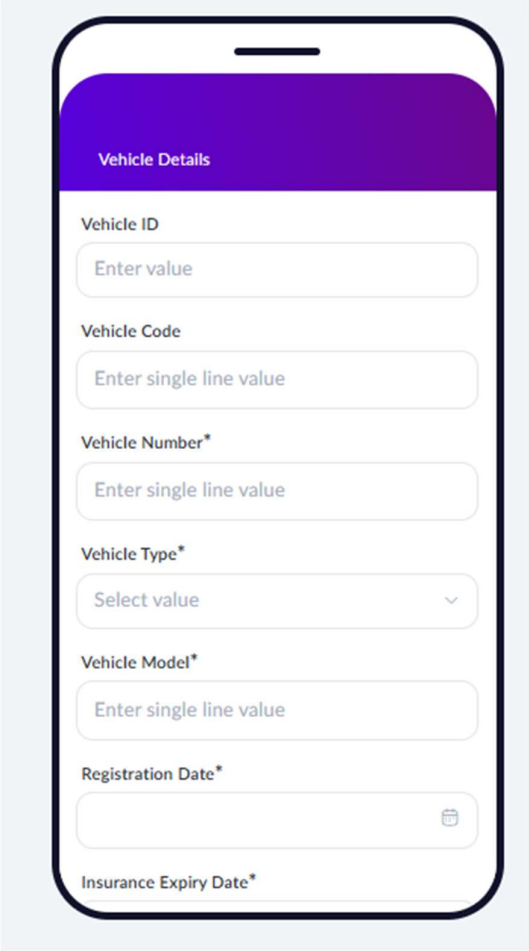

Figure 3: Mobile preview of the vehicle Details_Form (Address and additional fields)

Sample Records Entered

Illustrative sample data for the lab record.

Vehicle Number	Vehicle Type	Model	Seating Capacity	Fuel Type	Vehicle Status
TN 34 AB 5678	Car	Swift	5	Petrol	Available
TN 38 CD 1234	Bus	Ashok Leyland	40	Diesel	Available
TN 09 EF 9087	Van	Eeco	7	CNG	On Trip
TN 01 GH 4410	Car	Hyundai i20	5	Petrol	Available
TN 66 JK 2201	Bus	Tata Starbus	32	Diesel	Under Maintenance

Validation Test Cases

Test	Input	Expected Result
Mandatory field	Vehicle Number left blank	Submission should be blocked.
Seating capacity	Enter -5	Negative value should be rejected.
Vehicle status	Select Available	Status should be accepted.
Insurance expiry	Enter a valid date	Date should be accepted.
Vehicle number	Enter a duplicate number	Duplicate should be prevented if uniqueness validation is configured.

Result

The Vehicle Details Form was designed in Zoho Creator using basic form fields to collect and maintain vehicle information. The form supports vehicle registration, classification, insurance expiry tracking, seating capacity management, and vehicle status monitoring for the Transport Management System.
