Experiment 5-B

Command Center Page Using Page Builder Elements

Aim

To design and build a single internal Command Center Page in Zoho Creator for the Transport Management System, demonstrating all eleven Page Builder elements (Panel, Board, Chart, Gauge, Search, Form, Report, Snippets, Button, Widgets and Viewer).

Procedure

The Workflow Summary of the use case is used as the procedure.

1. Staff open Transport_Command_Center_Page and see the Fleet Utilization Gauge and Vehicle Status Chart.
2. Staff use the Vehicle/Driver Search Bar to find a vehicle number, driver name or Trip ID.
3. Coordinators drag trip cards across the Trip Status Board as trips start and finish.
4. Staff click the Send Insurance Alert Button to notify about insurance expiring within 30 days.
5. For an unplanned trip, staff use the Quick Trip Schedule Form from the command center.
6. The manager scrolls to the Full Trip Details Report for deeper analysis or export.
7. Staff refer to the Transport Policy Snippet, Availability Widgets and Vehicle Document Viewer.

Page Elements Used

Element	Element Name	Role on the Page
Panel	Command_Center_Main_Panel	Outer container; role-based visibility; holds the KPI cards
Board	Trip_Status_Board	Kanban columns mapped to Trip Status; drag to update the record
Chart	VehicleStatus_Distribution_Chart_Widget	Pie chart of vehicles per Vehicle Status; auto-refresh
Gauge	Daily_Fleet_Utilization_Gauge	Vehicles currently On Trip (e.g. 1 of 5); colour changes near full
Search	Vehicle_Driver_Search_Bar	Searches Vehicle Number, Driver Name, Trip ID
Form	Quick_Trip_Schedule_Form	Embedded Trip_Scheduling form with identical validation
Report	Full_Trip_Details_Report	Full report with manager-only export to Excel
Snippets	Transport_Policy_Snippet	Reusable transport policy and contact text
Button	Send_InsuranceAlert_Button	Triggers insurance expiry notification (within 30 days)
Widgets	Driver_And_Vehicle_Availability_Widgets	Driver status and vehicle availability
Viewer	Vehicle_Document_Viewer	Inline viewer for the vehicle image and related documents

Page Layout

- **Overview Strip:** Daily Fleet Utilization Gauge, Vehicle Status Distribution Chart, Vehicle/Driver Search Bar

- **Processing Workspace:** Send Insurance Alert Button, Trip Status Board
- **Detailed Data:** Full Trip Details Report
- **Sidebar:** Transport Policy Snippet, Vehicle Document Viewer, Quick Trip Schedule Form
- **Operations Strip:** Driver Availability and Vehicle Availability Widgets

Output Screenshots

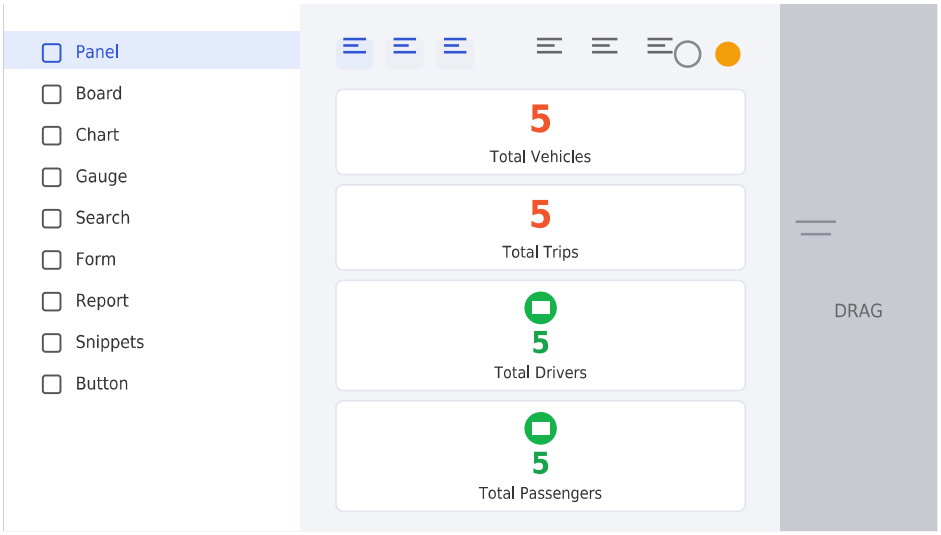

Figure 1: Page Builder (Transport_Command_Center): Panel element options with KPI cards (illustrative mock-up, not a screenshot).

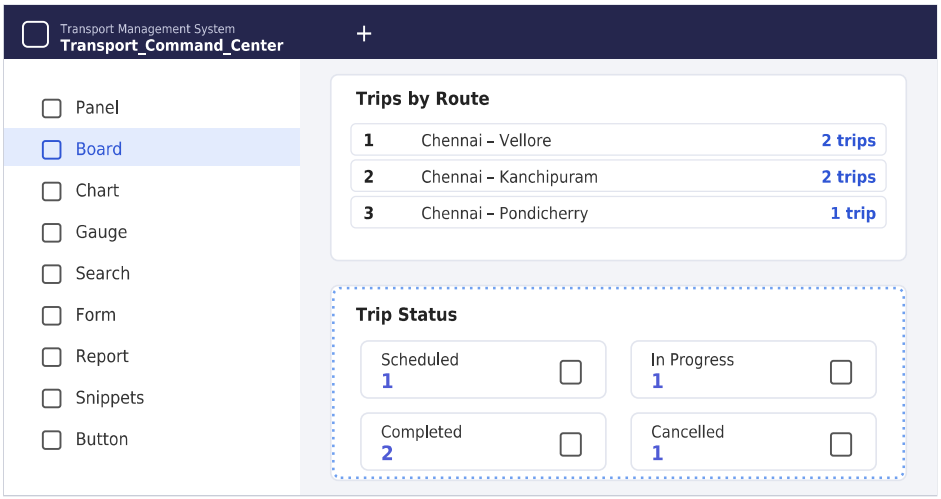

Figure 2: Page Builder: Board element options (illustrative mock-up).

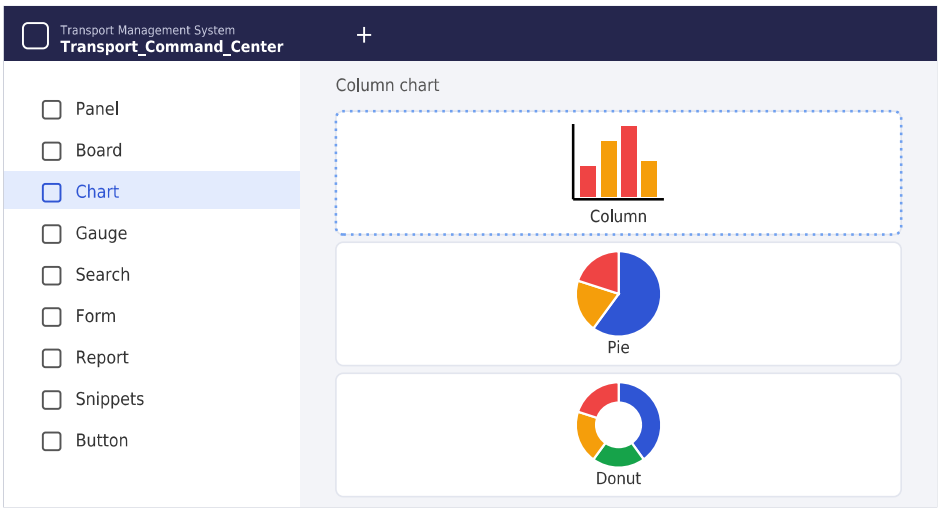

Figure 3: Page Builder: Chart element options (illustrative mock-up).

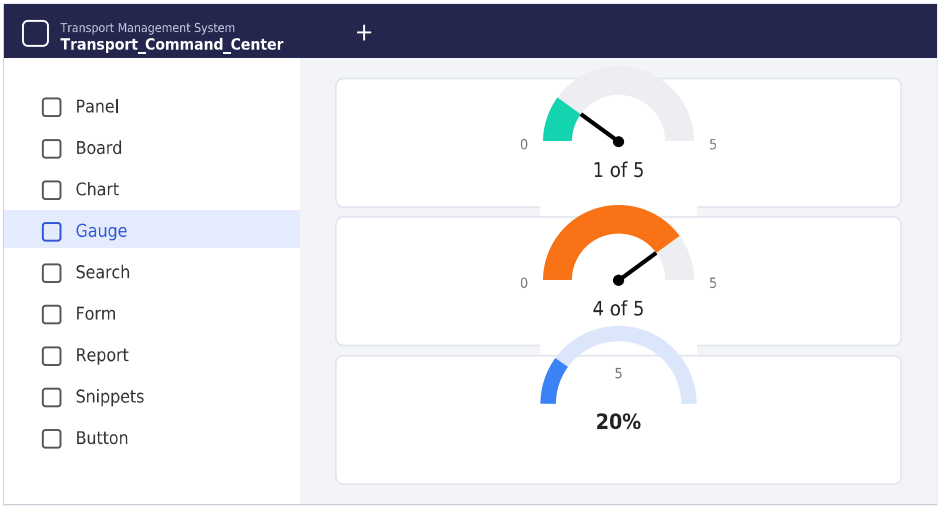

Figure 4: Page Builder: Gauge element options (illustrative mock-up).

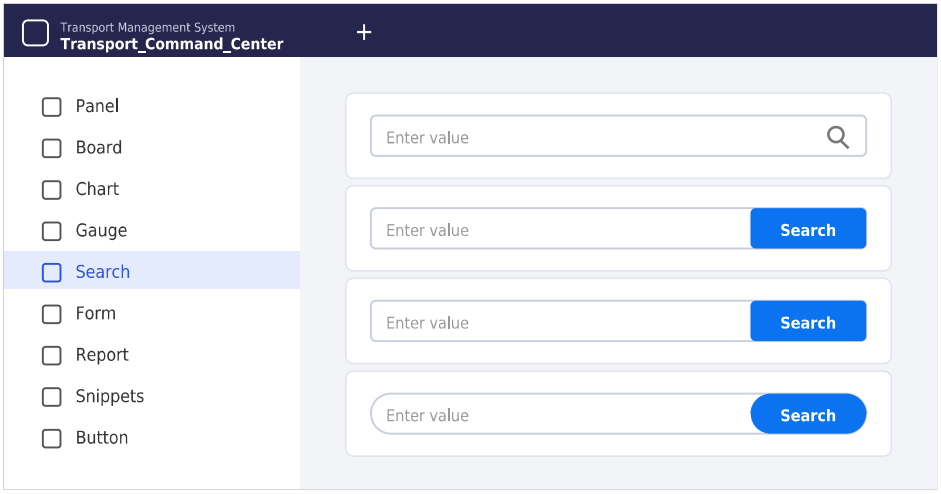

Figure 5: Page Builder: Search element styles (illustrative mock-up).

Sample Live Data on the Page

Sample data for this lab record. Values shown are the expected output for these sample records.

Element	Value Shown for the Sample Data
Daily_Fleet_Utilization_Gauge	1 of 5 vehicles On Trip (20%); colour moves from green towards red near full
VehicleStatus_Distribution_Chart_Widget	Available 3, On Trip 1, Under Maintenance 1
Trip_Status_Board	Scheduled 1, In Progress 1, Completed 2, Cancelled 1
Panel (summary)	5 vehicles, 5 drivers, 5 passengers, 5 trips; average route distance 114.8 KM
Full_Trip_Details_Report	5 records; export to Excel visible to manager accounts only

Element Behaviour Tests

Element	Test	Expected Result
Search	Enter TN 01 AB 1234	Returns the vehicle and its trip (TRP-001, driver Arun Kumar)
Board	Drag a card from Scheduled to In Progress	Trip Status updates instantly; the vehicle status changes to On Trip
Button	Click Send Insurance Alert	Alert mail is sent only for vehicles with insurance expiring within 30 days
Form	Schedule an unplanned trip	Same validations as Trip_Scheduling; new card appears on the board
Report	Open as coordinator / as manager	Export option appears for the manager only
Snippets	Edit the policy text once	Change appears wherever the snippet is reused
Widgets	Open driver and vehicle availability widgets	Driver status and vehicle availability are shown
Viewer	Upload a newer vehicle image	Latest file is displayed without changing any link
Panel	Open as a driver	Page not accessible; only manager and coordinator roles allowed

Implementation status: the dashboard KPI cards and charts of the project are implemented; the Button and Widgets elements above are configured as demonstration elements and their behaviour tests are pending verification.

Result

A single internal Transport_Command_Center_Page was designed in Zoho Creator using all eleven Page Builder elements, giving staff one workspace to monitor, search, process and reference trips, vehicles and drivers.
